

OTAVA® Desktop as a Service

Elevate your remote workforce.

OTAVA® Desktop as a Service (DaaS) provides a complete virtual workspace from the cloud, delivering desktops and hosted apps as an easily managed, integrated cloud service. Enterprises can rapidly provision desktops and applications to users on any device, anywhere. Furthermore, virtual desktops are transformed from the CapEx outlay inherent in enterprise onsite infrastructures, to a more flexible OpEx expenditure model.

OTAVA® DaaS features include:

- Unified Desktop and Application Access
- Convenient Single Sign On
- Improved Desktop Performance
- Persistent State Save
- Enterprise Integration and Service
- Simplified Management
- Extended Credentials and Security Policies
- Integrated Security

What can you expect from OTAVA® Desktop as a Service?

- **Stronger Predictability**
Reduce upfront costs and lower desktop TCO with predictable cloud economics.
- **More Productive Workforce**
Empower employees to work more efficiently within an optimized virtual infrastructure and desktop experience.
- **More Secure Workforce**
Rigorously protect employees, devices and data from cybercrime when working remotely.
- **Reduced Costs**
Virtual desktops and servers are more cost effective to provision on a per-user basis, and businesses can also save on office space they no longer need.
- **Efficiently Deploy New Workstations**
Create custom environments with unique apps and programs for different employee roles, and conveniently provision new virtual desktops as needed.
